

# Nuggets UNICEF, INCLUSION 2.0

## Mr. Gopal Mitra

- ✦ Make e a **conscious effort to be inclusive**. If you are not relentless to move forward, you may fall behind. Do not let unintentional exclusion creep in.
- ✦ The **dichotomy between efficiency and empathy is often a false one**. You can have both. Options are out there. You need to search, find out, compare and show the realities to the policy-makers from all angles.
- ✦ The **biggest barriers are often in our minds**. Question, transform and innovate together with children and youth as they are fearless, and they will show you the way with their energy. Involve everyone in the conversation.
- ✦ **Accessibility, simplicity, technology**—use all to your advantage so that you can go for significant inclusion. Small improvements build up over time to make a sizeable impact.
