### UN WOMEN, INCLUSION 2.0

#### Ms. Muthoni Muriu

- ✦ If you want to make a change, join the public service. Be the Minister of Health you want to see.
- ✦ If you want to create an inclusive team where everyone feels safe to speak out and to take risks, target trust, but first and foremost, psychological safety.
- ✦ Expand your cultural bandwidth, embrace extra steps, adopt feminist principles and be aware of the constant friction between efficiency and empathy.
- ✦ Put your own house in order first and be authentic because representation matters and hinges on shared understanding and mutual accountability
